Profile

Software Developer and Physics Graduate with **4+ years of experience** building AI-driven ecosystems and high-performance applications. Expert in multi-agent AI systems and autonomous task orchestrators. Founding Engineer at Hola ELO, scaling the platform from **Day 0 to 400+ paying users**. Strong analytical foundation in physics applied to complex system optimization and scalable full-stack architectures.

Experience

2024–Present **Lead Software Developer (Founding Engineer)**, *Hola ELO*, Monterrey, MX

- Engineered ELO HUB from the ground up, scaling to **400+ active paying users** with optimized AWS cloud infrastructure.
- Designed a **Multi-Agent AI Assistant** for clinical management, leveraging RAG for financial advising, automated scheduling, and intelligent clinical note generation.
- Developed an **AI Task Orchestrator** that allows non-technical staff to trigger bug fixes and operations via natural language, reducing engineering manual workload by 40%.
- Built an **AI Transcription System** for sessions, using semantic analysis to deliver automated summaries and data-driven therapeutic recommendations.
- Performance: Reduced application load times by 35% and optimized API latency by 25%.

2023–2024 **Software Developer**, *Innova Solutions*, Monterrey, MX

- Delivered 2 enterprise-scale applications using React and Spring Boot, meeting 100% of production deadlines.
- Architected a library of **reusable UI components** that decreased frontend development time by 30%.
- Optimized CI/CD pipelines with Jenkins and AWS, reducing deployment error rates by 40%.

2022–2023 **Software Developer Intern**, *Innova Solutions*, Monterrey, MX

- Developed custom **Salesforce Lightning Web Components (LWC)** and Apex controllers to automate internal CRM workflows.
- Enhanced data tracking and reporting efficiency by 20% through automated backend processes.

Education

2018–2024 **Bachelor in Physics**, *Universidad Autónoma de Nuevo León*, Monterrey, MX

2021–2022 **Full Stack Web Certification**, *Academlo*, Online

Skills

Languages JavaScript (ES6+), TypeScript, Python, Ruby, Java, Apex (Salesforce).

AI/Data Multi-Agent Systems, RAG, Prompt Engineering, PyTorch, NumPy, Pandas.

Tech Stack React, Node.js, Ruby on Rails, Spring Boot, PostgreSQL, MongoDB.

Cloud/DevOps AWS (Lambda, Bedrock/OpenAI, S3), Docker, Jenkins, Git, CI/CD.

Languages

Spanish Native

English B2 Level - Professional Working Proficiency
